TECH SKILLS

- SQL, Power BI, KNIME
- CMake, Qt
- Unreal Engine, Unity
- GIT, P4V, Github

PROGRAMMING

- C++, C#, Dart
- Python
- HTML, CSS
- JavaScript, TypeScript
- React, Flutter, .NET

SKILLS

- Mathematics
- Problem Solving
- Troubleshooting
- Team Collaboration

LANGUAGES

- English: C1
- French: B2
- Dutch: Native

PERSONAL PROFILE

I'm a motivated software engineer who thinks outside the screen, with a passion for software that operates close to the real world, from real-time pipelines to operational systems.

CAREER SUMMARY

Software Consultant / Junior Consulting Project Feb 2026 - Jun 2026
AHLEX / Brussels Airport:

- Working as a consultant on various projects where I work closely with stakeholders: **Swissport**, **DHL**, **DNATA** and **Qatar Airways**.

Software Engineer / Remote End of Study Internship Feb 2025 - Jun 2025
Dutch Game Studio:

- Developed software solutions for clients including **JBL** and **Coca-Cola**, working remotely across teams and time zones to deliver projects on schedule.

Software Engineer / Summer Internship Jun 2024
Belgian Defence / Federal Police / XR-Labs:

- Developed an offline, multi-language, multi-threaded real-time speech-to-text pipeline using **Python**.

EDUCATION

M. Sc. Software Engineering and Information Systems 2026 - 2028

University of Oulu, Finland

- Pursuing a Master's degree to deepen my knowledge of software engineering fundamentals, embedded systems, intelligent systems (IS), and artificial intelligence (AI).

Advanced Bachelor: Business Management 2025 - 2026

UCLL, University Colleges Leuven-Limburg, Belgium

Business & Data Analysis

- Developing skills in data management, visualization, and dashboarding with tools such as **SQL**, **Power BI** and **KNIME**.

Bachelor Game Development, cum laude 2022 - 2025

Digital Arts and Entertainment, Howest, Belgium

- Shipped multiple indie titles from concept to launch, both solo and in small teams. Always happy to discuss my portfolio!
- 3-year member of the student council: Collaborated with faculty to address student needs and the improvement of campus life.

Kajaani University of Applied Sciences, Finland Aug 2024 - Dec 2024

- Deepened C++ expertise through advanced coursework, alongside hands-on 3D, motion capture and mobile software projects.

Brussels, 27/04/2025

To whom it may concern,

We hereby wish to express, on behalf of XR-Labs, our deep appreciation for the commitment and contribution Of Sebastiaan Vryens during his voluntary internship within our team in summer 2024.

On his own initiative, Sebastiaan ran a proof of concept around the implementation of voice recognition set up within our XR simulator for the benefit of the special units of the Federal Police and Defence. His work demonstrated a thorough technical knowledge, a strong analytical ability and a high degree of independence. In a short time, he managed to integrate himself into the project and provide the basis of a valuable, practical solution which will significantly support the further development of our projects.

Sebastiaan also distinguished himself by his professional attitude and eagerness to learn.

He showed not only initiative but also the maturity to take responsibility for his project and closely monitor its progress.

We therefore look back on his summer internship with particular satisfaction and are convinced that Sebastiaan has the right qualities to become a valuable strength within each team.

Should you require further information on his achievements within XR-Labs, please do not hesitate to contact us.

Sincerely, Jeroen Nelis
Project Lead XR-Labs
